

**ROLL HIGHER
WORKING STRONGER.
MOVING STEADIER.
SERVING LONGER.**

Superior container handling comes down to no big secrets — just big Bridgestone VCHS steel radials. With extra-firm sidewalls to enhance stability. Special treads with more rubber for less lug movement and longer, consistent wear. Puncture-resistant casing for greater durability under heavy pressure. After all, to handle the toughest tasks, you need the toughest tires. Why take a chance on anything less? Roll on high with Bridgestone.

| PATT | Size | Type | Star rating |
|------|-------------------|------|-------------|
